

# Student 1

# My solar Powered Oven

We built a solar oven, because we want to if it would work. In my group I helped by putting the top on and the tape on the oven.

We learned about renewable energy and wanted to test the sun's power

My oven showed that it worked, because the chocolate was very melted and the marshmallow was kinda melted

Next time I would put it the top in a different spot

## Student 2

## My solar Powered Oven

We built a solar oven because we wanted to try something new.

In my group i helped by doing most of the work for the oven to work.

We learned about renewable energy and wanted to test the sun's power!

---

My oven Showed that it worked because the chocolate and some of the marshmallow Melted to.

*Student 3+*

*My solar powered oven*

We built a solar oven because we wanted to Eat

In my group i helped by cutting the paper

We learned about renewable energy and wanted to test the sun's power!

My oven showed that it worked because the chocolate

Next time i would i will Do it again.
