

I observe

- The leaves blow and fall off in the wind.
- Parts of the grass are dead.
- The grass that is dead is closest to the curb or concrete.

I think

• The climate is cooling so that means the leaves are going to be falling off because it's Fall Ha Ha Ha.

• The concrete has something to do with only that bit of grass ~~get~~ ~~die~~ ~~thing~~ dying.

I think that the son is the reason that the grass in the middle of the field is dead.

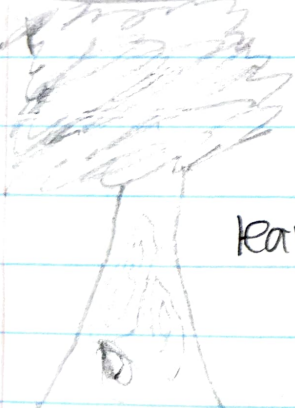

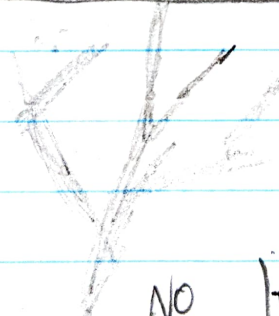

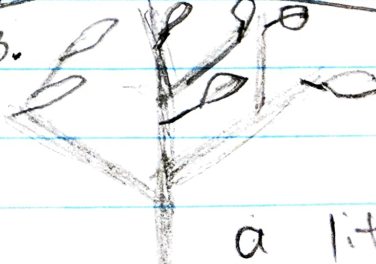

I wonder?

• I wonder if some of the trees are not affected by the climate change. They can survive cooler climates and not lose their leaves and stay green.

• I wonder if the concrete has something to do with the grass only dying around that area and nowhere else.

I wonder if the son is the reason that the grass in the middle is dead.

9/22/22 Backyard observation in school.

Observations	Think	Wonder
1. I noticed fallen trees.	I think it 1. broke dew to weather.	I wonder if 1. the climate had anything to do with
2. I saw no wild life.	2. Maybe the animals are hiding due to the climate.	the fallen tree.
3.  <p>leaves</p>	3.  <p>No leaves</p>	2. I wonder if the birds are already getting ready for winter.
		3.  <p>a little bit of leaves.</p>

7/22 Backyard Observations

I observe	I wonder	I think
• The wind rustling the trees	• How does wind form?	• It is formed by changing temperature and pressure
• I see lots of dead and fallen down trees	• How did they fall down?	• I think they fell after heavy storms or winds
• I see there are lots of different rocks in the asfalt	• What type of rocks are they?	• I think it was made from sedamentary rocks
