Energy Data Collection

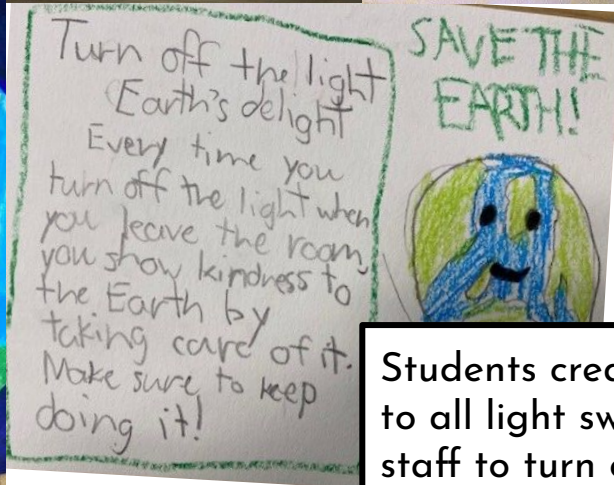

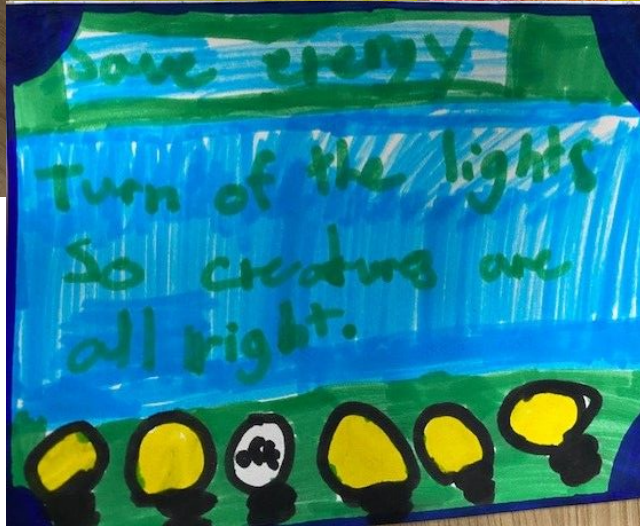

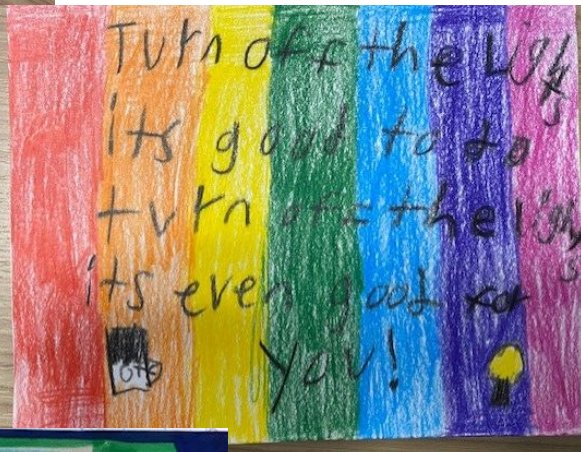

Empty Rooms with Lights On			
Empty Rooms with Lights Off			

Reflection

There were many empty rooms
with lights on which is a
problem.

Energy Patrol students collecting data on the number of empty classrooms with lights on and the lights off.

Students created mini posters to place next to all light switches to remind students and staff to turn off the lights before leaving an empty room.

Students delivered mini posters to staff around the school building. The light switches were placed by light switches to remind students and staff to turn off the lights and conserve energy.
