

# Earth Day Project!

Earth day activities: Think about how YOU can help the Earth. Pick **ONE** of the following activities. Attach your document or a picture of your work when completed.

1. Reuse
2. Self portrait
3. Impact
4. Reduce

1. Make something new out of something old. Reuse materials to create an art project, a gift, or a tool. Or find toys and clothes around your house that you don't need anymore and put in a bag to donate.

2. Collect environmental items from outside and make a self portrait. (Remember, picking flowers takes food away from pollinators try to find things that are no longer attached to the Earth)

3. Identify 3 ways you are currently helping the Earth. Think of 3 MORE ways you could help the Earth, and a plan to follow through.

4. Look at each of these images, can you think of a reusable item to help reduce these items in the trash cans? (Draw or write about the item we should use in place of the non-reusable item)

1. Make something new out of something old. Recycle materials to create an art project, a gift, or a tool. Or find toys and clothes around your house that you don't need anymore and put in a bag to donate.

Here are some examples...

## RECYCLED ART SCULPTURES

2. Collect environmental items from outside and make a self portrait.
