

# Earth Day & Service Day

## What is Service Day?

---

**Service day** is when we **work together** with our classmates to **help** our community.

This year, Service Day is the same week as **Earth Day**, which is a day we celebrate and help take care of the earth and the environment.

## Our Goals:

---

- To learn how we can help the environment by reusing, reducing and recycling
- Make new crayons from old crayons!

# How Can We Help Our Community?

Where do these broken crayons end up?

A Landfill!

Let's Recycle Them Instead!

# Crayons

**Step 1: Sort your crayons by color.**

**Step 2: Peel the paper off your crayons.**

**Step 3: Break your crayons into small pieces.**

**Step 4: Fill your mold with broken crayons.**

## What next?

- We will take your crayons home and put them in the oven. The old crayons will melt into new crayons!
