

Sandy Spring Friends School | Green Schools Application | Objective 1.1

GRADE	Grade 7
STUDENT COUNT	41
CLASS	Science
DATE	September 20, 2025
LESSON	Atmosphere Project
TEACHER	Charley Bouwmans

Lesson Description:

Seventh graders explored the Earth's atmosphere through a hands-on display project. They investigated the layers of the atmosphere, weather patterns, and how the atmosphere supports life. Working in groups, students analyzed information, made observations, and decided how best to represent their findings. This project encourages critical thinking and connects classroom learning to real-world environmental systems.
