

Sandy Spring Friends School | Green Schools Application | Objective 1.1

GRADE	Kindergarten
STUDENT COUNT	13
CLASS	Science
DATE	October 29, 2025
LESSON	Field Trip to Sharp's Farm/Honeybees
TEACHER	Erin Scott Beth Seals

Lesson Description:

Students learned why honeybees matter and how pollination helps produce the fruits and vegetables we eat. They studied the role bees play in supporting healthy ecosystems and food systems. During a visit to Sharp's Farm in Brookeville, MD, Farmer Chuck explained how important honeybees are to the farm's crops. Students observed an active hive and learned how bees help pumpkins and other plants grow, connecting their classroom learning to real-world agriculture.
